

Smart Exchange Traded Funds Australasia Series

Product Disclosure Statement

Offer of units in the Smart Exchange Traded Funds.

This document gives you important information about this investment to help you decide whether you want to invest. There is other useful information about this offer on disclose-register.companiesoffice.govt.nz. Smartshares Limited has prepared this document in accordance with the Financial Markets Conduct Act 2013. You can also seek advice from a financial advice provider to help you to make an investment decision.

This is a replacement product disclosure statement. It replaces the Product Disclosure Statement - Australasia Series dated 10 October 2024.

 **Issued by Smartshares Limited.**
22 September 2025

1. Key information summary

This Product Disclosure Statement - Australasia Series covers 14 of the funds in the Smart Exchange Traded Funds (**Scheme**).

The other 30 funds in the Scheme are covered by the Core Series and Global Series product disclosure statements, which are available at smartinvest.co.nz.

What is this?

This is a managed investment scheme. Your money will be pooled with other investors' money and invested in various investments. Smartshares Limited (**Smart, we, our or us**) will invest your money and charge you a fee for our services. The returns you receive are dependent on the investment decisions of Smart and the performance of the investments. The value of those investments may go up or down. The types of investments and the fees you will be charged are described in this product disclosure statement.

What will your money be invested in?

The Scheme has 44 exchange traded funds (each listed on the NZX Main Board). This product disclosure statement covers 14 of those funds, each of which are summarised on pages 3 to 4. More information about the investment target and strategy for each of these funds is provided in section 3.

Who manages the Scheme?

Smart is the manager of the Scheme. See section 7 for more information.

What are the returns?

For some funds, you may choose to have distributions paid to you. See section 3 for whether a fund pays distributions and when (we may change when distributions are paid at any time following consultation with the supervisor).

How can you get your money out?

Units in the funds are quoted on the NZX Main Board, so you can sell your investment if there are interested buyers. The amount you get may be less than the amount that you invested.

Investments in the Scheme are generally not redeemable for cash. See section 2 for more information.

How will your investment be taxed?

Each fund is a listed portfolio investment entity (**PIE**). As a listed PIE, each fund will pay tax on taxable income at the rate of 28%. See section 6 for more information.

Where can you find more key information?

We are required to publish quarterly updates for each fund. The updates show the returns, and the total fees actually charged to investors, during the previous year. The latest fund updates are available at smartinvest.co.nz. We will also give you copies of fund updates on request.

Funds summarised in this product disclosure statement

Each fund aims to provide a return to investors that matches the investment objective for the fund, before taking into account tax, fees and other expenses.

Fund	Description and investment objective	Risk indicator	Fund charges (% per annum of the fund's net asset value)
New Zealand shares			
Smart NZ Top 50 ETF (FNZ)	Invests in New Zealand shares and is designed to track the return of the S&P/NZX 50 Portfolio Index, which has a 5% cap on the weight of each company.	Lower risk 1 2 3 4 5 6 7 Potentially lower return Potentially higher return	0.50%
Smart S&P/NZX 20 ETF (NZT)	Invests in New Zealand shares and is designed to track the return of the S&P/NZX 20 Gross with Imputation Index.	Lower risk 1 2 3 4 5 6 7 Potentially lower return Potentially higher return	0.20%
Smart NZ Top 10 ETF (TNZ)	Invests in New Zealand shares and is designed to track the return of the S&P/NZX 10 Index.	Lower risk 1 2 3 4 5 6 7 Potentially lower return Potentially higher return	0.60%
Smart NZ Mid Cap ETF (MDZ)	Invests in New Zealand shares and is designed to track the return of the S&P/NZX MidCap Index.	Lower risk 1 2 3 4 5 6 7 Potentially lower return Potentially higher return	0.60%
Smart NZ Dividend ETF (DIV)	Invests in New Zealand shares and is designed to track the return of the S&P/NZX 50 High Dividend Index.	Lower risk 1 2 3 4 5 6 7 Potentially lower return Potentially higher return	0.54%
Australian shares			
Smart Australian Top 20 ETF (OZY)	Invests in Australian shares and is designed to track the return of the S&P/ASX 20 Index.	Lower risk 1 2 3 4 5 6 7 Potentially lower return Potentially higher return	0.60%
Smart Australian Mid Cap ETF (MZY)	Invests in Australian shares and is designed to track the return of the S&P/ASX MidCap 50 Index.	Lower risk 1 2 3 4 5 6 7 Potentially lower return Potentially higher return	0.75%
Smart Australian Dividend ETF (ASD)	Invests in Australian shares and is designed to track the return of the S&P/ASX Dividend Opportunities Index.	Lower risk 1 2 3 4 5 6 7 Potentially lower return Potentially higher return	0.54%
Smart Australian Financials ETF (ASF)	Invests in Australian shares and is designed to track the return of the S&P/ASX 200 Financials Ex-A-REIT Index.	Lower risk 1 2 3 4 5 6 7 Potentially lower return Potentially higher return	0.54%
Smart Australian Resources ETF (ASR)	Invests in Australian shares and is designed to track the return of the S&P/ASX 200 Resources Index.	Lower risk 1 2 3 4 5 6 7 Potentially lower return Potentially higher return	0.54%
Smart Australian ESG ETF (AUE)	Invests in Australian shares and is designed to track the return of the S&P/ASX 200 Fossil Fuel Screened Total Return Index.	Lower risk 1 2 3 4 5 6 7 Potentially lower return Potentially higher return	0.50%

Fund	Description and investment objective	Risk indicator	Fund charges (% per annum of the fund's net asset value)
Property			
Smart NZ Property ETF (NPF)	Invests in New Zealand property and is designed to track the return of the S&P/NZX Real Estate Select Index.	Lower risk 1 2 3 4 5 6 7 Higher risk Potentially lower return Potentially higher return	0.54%
Smart Australian Property ETF (ASP)	Invests in Australian property and is designed to track the return of the S&P/ASX 200 A-REIT Equal Weight Index.	Lower risk 1 2 3 4 5 6 7 Higher risk Potentially lower return Potentially higher return	0.54%
Bonds			
Smart NZ Bond ETF (NZB)	Invests in New Zealand bonds, with the objective of outperforming the S&P/NZX A-Grade Corporate Bond Total Return Index over rolling 3-year periods.	Lower risk 1 2 3 4 5 6 7 Higher risk Potentially lower return Potentially higher return	0.54%

See the Core Series and Global Series product disclosure statements for information about the 30 other funds in the Scheme, which are available at smartinvest.co.nz

*The risk indicators are based on returns data for the 5 years to 30 June 2025. Some of these funds have not been in existence for 5 years, so a combination of actual returns and market index returns have been used to complete the risk indicators. As a result, the risk indicators may provide a less reliable indicator of the potential future volatility of these funds. The risk indicator for the Smart Australian ESG ETF uses 3 years of market index returns. The risk indicator for the Smart S&P/NZX 20 ETF uses 4 years and 3 months of market index returns.

The Scheme has an establishment fee of \$30. This one-off fee applies when you first invest in the Scheme. It does not apply to further investments in the Scheme (including when you invest in additional funds in the Scheme) or if you buy units in a fund through an NZX Participant (such as a broker) or financial advice provider (although the NZX Participant or financial advice provider may charge you a fee for its services).

See section 4 for an explanation of the risk indicator and for information about other risks that are not included in the risk indicator. To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at sorted.org.nz/tools/investor-profiler.

2. How does this investment work?

The key benefits of the Scheme are:

- **Diversification:** With one simple purchase you get an investment in a range of securities, such as listed companies or government bonds, spreading your risk more broadly.
- **Low fees:** The funds keep costs down because for funds that track indices we do not need to make active investment decisions, which may require spending on research and analytical expertise.
- **Flexibility:** Units trade like individual shares. From as little as \$500 up front and \$50 per month, a regular savings plan is a simple and affordable way to accumulate units. See 'Making Investments' on page 7 for more information on how to invest in the Scheme.
- **Convenience:** The funds enable you to build a global portfolio in New Zealand dollars, without having to worry about the complexity of managing foreign currencies or overseas tax. Distributions are paid in New Zealand dollars and automatically reinvested for you, unless you choose to receive them in cash.

The Scheme is a managed investment scheme under the Financial Markets Conduct Act 2013. To protect the interests of investors, the Scheme's investments are held by an independent custodian, BNP Paribas Fund Services Australasia

Pty Ltd, and our operations are supervised by an independent supervisor, Public Trust. The Scheme is governed by a master trust deed between the supervisor and us, and each fund is established as a separate trust.

Your money is pooled and invested with other investors' money.

Every time you pay money into the Scheme you will receive units in the funds you invest in. The number of units that you hold in a fund represents your proportionate interest in that fund. All units in a fund have equal value.

Units only give a beneficial interest in fund assets and do not give you any right to any particular asset of a fund.

All funds have assets (the investments of the fund) and liabilities (the taxes, fees and costs payable by the fund). All liabilities incurred in respect of a fund will be met from the assets of that fund. If the investments in a fund are not sufficient to meet its liabilities, the investments in another fund cannot be used to meet those liabilities.

For some funds, you may choose to have distributions paid to you. See section 3 for whether a fund pays distributions and when (we may change when distributions are paid at any time following consultation with the supervisor).

The Scheme may undertake securities lending (which generates additional revenue for the benefit of investors and us).

Making investments

To invest in the Scheme, you can buy units in the funds through an NZX Participant (such as a broker) or financial advice provider. Go to nzx.com/investing/find-a-participant for a list of NZX Participants.

You can also invest in the Scheme by applying at smartinvest.co.nz. The minimum initial contribution amount is \$500. After that, you can make further investments through:

- a cash application for further units (the minimum contribution amount is \$250);
- a regular savings plan (the minimum contribution amount is \$50 per month); and/or
- the reinvestment of distributions.

Contributions will be direct debited from your bank account on or about the 20th day of the month and units will be allocated to you on or about the 3rd business day of the following month. You will receive a statement setting out details of your updated investments (you can also view this information at smartinvest.co.nz).

Institutional investors are permitted to make basket contributions (or in the case of the Smart NZ Bond ETF, institutional investor contributions). For more information, please see the 'Other Material Information' document on the offer register at disclose-register.companiesoffice.govt.nz.

Withdrawing your investments

Units in the funds are quoted on the NZX Main Board, so you can sell your investment through an NZX Participant (such as a broker) or financial advice provider if there are interested buyers.

Investments in the Scheme are generally not redeemable for cash.

Institutional investors are permitted to make basket withdrawals (or in the case of the Smart NZ Bond ETF, institutional investor withdrawals). For more information, please see the 'Other Material Information' document on the offer register at disclose-register.companiesoffice.govt.nz.

How to switch between funds

You can invest in more than one fund at a time. However, you cannot switch from one fund to another fund. If you want to switch funds, you must first sell your existing investment in a fund and then buy an investment in another fund.

3. Description of your investment options

Each fund aims to provide a return to investors that matches the investment objective for the fund, before taking into account tax, fees and other expenses.

Description, investment objective and target investment mix	Risk indicator	Minimum suggested investment timeframe	Distributions
New Zealand shares			
Smart NZ Top 50 ETF (FNZ) Invests in New Zealand shares and is designed to track the return of the S&P/NZX 50 Portfolio Index, which has a 5% cap on the weight of each company.	Lower risk 1 2 3 4 5 6 7 Potentially lower return Potentially higher return	5 - 10 years	June and December
100% Australasian equities			
Smart S&P/NZX 20 ETF (NZT) Invests in New Zealand shares and is designed to track the return of the S&P/NZX 20 Gross with Imputation Index	Lower risk 1 2 3 4 5 6 7 Potentially lower return Potentially higher return	5 - 10 years	June and December
100% Australasian equities			
Smart NZ Top 10 ETF (TNZ) Invests in New Zealand shares and is designed to track the return of the S&P/NZX 10 Index.	Lower risk 1 2 3 4 5 6 7 Potentially lower return Potentially higher return	5 - 10 years	June and December
100% Australasian equities			
Smart NZ Mid Cap ETF (MDZ) Invests in New Zealand shares and is designed to track the return of the S&P/NZX MidCap Index.	Lower risk 1 2 3 4 5 6 7 Potentially lower return Potentially higher return	5 - 10 years	June and December
100% Australasian equities			
Smart NZ Dividend ETF (DIV) Invests in New Zealand shares and is designed to track the return of the S&P/NZX 50 High Dividend Index.	Lower risk 1 2 3 4 5 6 7 Potentially lower return Potentially higher return	5 - 10 years	June and December
100% Australasian equities			
Australian shares			
Smart Australian Top 20 ETF (OZY) Invests in Australian shares and is designed to track the return of the S&P/ASX 20 Index.	Lower risk 1 2 3 4 5 6 7 Potentially lower return Potentially higher return	5 - 10 years	June and December
100% Australasian equities			
Smart Australian Mid Cap ETF (MZY) Invests in Australian shares and is designed to track the return of the S&P/ASX MidCap 50 Index.	Lower risk 1 2 3 4 5 6 7 Potentially lower return Potentially higher return	5 - 10 years	June and December
100% Australasian equities			

Description, investment objective and target investment mix	Risk indicator	Minimum suggested investment timeframe	Distributions
Smart Australian Dividend ETF (ASD) Invests in Australian shares and is designed to track the return of the S&P/ASX Dividend Opportunities Index. 100% Australasian equities		5 - 10 years	June and December
Smart Australian Financials ETF (ASF) Invests in Australian shares and is designed to track the return of the S&P/ASX 200 Financials Ex-A-REIT Index. 100% Australasian equities		5 - 10 years	March and September
Smart Australian Resources ETF (ASR) Invests in Australian shares and is designed to track the return of the S&P/ASX 200 Resources Index. 100% Australasian equities		5 - 10 years	June and December
Smart Australian ESG ETF (AUE) Invests in Australian shares and is designed to track the return of the S&P/ASX 200 Fossil Fuel Screened Total Return Index. 100% Australasian equities		5 - 10 years	None
Property			
Smart NZ Property ETF (NPF) Invests in New Zealand property and is designed to track the return of the S&P/NZX Real Estate Select Index. 100% Listed property		5 - 10 years	June and December
Smart Australian Property ETF (ASP) Invests in Australian property and is designed to track the return of the S&P/ASX 200 A-REIT Equal Weight Index. 100% Listed property		5 - 10 years	June and December
Bonds			
Smart NZ Bond ETF (NZB) Invests in New Zealand bonds, with the objective of outperforming the S&P/NZX A-Grade Corporate Bond Total Return Index over rolling 3-year periods. 100% New Zealand fixed interest		1 - 3 years	March, June, September and December
See the Core Series and Global Series product disclosure statements for information about the 30 other funds in the Scheme, which are available at smartinvest.co.nz			

* The risk indicators are based on returns data for the 5 years to 30 June 2025. Some of these funds have not been in existence for 5 years, so a combination of actual returns and market index returns have been used to complete the risk indicators. As a result, the risk indicators may provide a less reliable indicator of the potential future volatility of these funds. The risk indicator for the Smart Australian ESG ETF uses 3 years of market index returns. The risk indicator for the Smart S&P/NZX 20 ETF uses 4 years and 3 months of market index returns.

See the 'Other Material Information' document on the offer register at disclose-register.companiesoffice.govt.nz for more information about the indices referred to on pages 8 to 9. The Statement of Investment Policy and Objectives (**SIPO**) for the Scheme sets out the investment policies and objectives for the Scheme. We may change the SIPO at any time following consultation with the supervisor. We will give you at least 30 days' notice of any change that is expected to have a material effect on you.

The SIPO is available at smartinvest.co.nz. Material changes to the SIPO will be described in the Scheme's annual report. Further information about the assets in each fund can be found in the fund updates at smartinvest.co.nz.

4. What are the risks of investing?

Understanding the risk indicator

Managed funds in New Zealand must have a standard risk indicator. The risk indicator is designed to help investors understand the uncertainties both for loss and growth that may affect their investment. You can compare funds using the risk indicator.

See section 3 for the risk indicators which have been calculated for each of the funds.

The risk indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the fund's assets goes up and down (volatility). A higher risk generally means higher potential returns over time, but more ups and downs along the way.

To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at sorted.org.nz/tools/investor-profiler.

Note that even the lowest category does not mean a risk-free investment, and there are other risks (described under the heading 'Other specific risks') that are not captured by this rating.

This risk indicator is not a guarantee of a fund's future performance. The risk indicator is based on the returns data for 5 years to 30 June 2025. While risk indicators are usually relatively stable, they do shift from time to time. You can see the most recent risk indicator in the latest fund update for each of the funds.

General investment risks

Some of the things that may cause a fund's value to move up and down, which affect the risk indicator, are:

- **Market risk:** The risk that a market or a sector of a market that a fund invests in declines.
- **Individual financial product risk:** The risk that changes in the financial condition or credit rating of an issuer of a financial product causes the value of a financial product held by a fund to decline.

- **Liquidity risk:** The risk that an investment is difficult to buy or sell and a fund suffers a loss as a result.
- **Currency risk:** The risk that changes in exchange rates cause the value of an international investment to reduce.
- **Credit risk:** The risk that issuers of fixed interest or cash investments do not pay interest and/or capital repayments when these are due.
- **Interest rate risk:** The risk that interest rates rise and the value of investments (in particular, fixed interest and cash investments) may reduce.

Other specific risks

There are other risks that may affect returns for investors, which are not reflected in the risk indicator.

These risks include:

- **Fund tracking risk:** The funds covered by this product disclosure statement (other than the Smart NZ Bond ETF) are designed to track specific indices. There is a risk that a fund that is designed to track the return of an index achieves a lower return than the index itself. Tracking difference may occur when the weighting of each of the financial products in an index changes, and the fund that tracks the index is not able to exactly match that change.
- **Securities lending risk:** Many of the funds covered by this product disclosure statement have the ability to implement securities lending. Please refer to the SIPO for information on each fund. There is a risk that a borrower of securities may become insolvent or otherwise unable to meet its obligations to return the borrowed securities to the Scheme.

See the 'Other Material Information' document on the offer register at disclose-register.companiesoffice.govt.nz for further information about the risks of investing in the Scheme.

5. What are the fees?

You will be charged fees for investing in the Scheme. Fees are deducted from your investment and will reduce your returns. If we invest in other funds, those funds may also charge fees (these fees are included in the fund charges below). The fees you pay will be charged in two ways:

- regular charges (for example, fund charges). Small differences in these fees can have a big impact on your investment over the long term; and
- one-off fees (for example, establishment fees).

These are as follows:

Fund	Fund charges (% per annum of the fund's net asset value)	Individual action fees
New Zealand shares		Establishment fee: \$30 This one-off fee applies when you first invest in the Scheme. It does not apply to further investments in the Scheme (including when you invest in additional funds in the Scheme) or if you buy units in a fund through an NZX Participant (such as a broker) or financial advice provider (although the NZX Participant or financial advice provider may charge you a fee for its services).
Smart NZ Top 50 ETF (FNZ)	0.50%	
Smart S&P/NZX 20 ETF (NZZ)	0.20%	
Smart NZ Top 10 ETF (TNZ)	0.60%	
Smart NZ Mid Cap ETF (MDZ)	0.60%	
Smart NZ Dividend ETF (DIV)	0.54%	
Australian shares		
Smart Australian Top 20 ETF (OZY)	0.60%	
Smart Australian Mid Cap ETF (MZY)	0.75%	
Smart Australian Dividend ETF (ASD)	0.54%	
Smart Australian Financials ETF (ASF)	0.54%	
Smart Australian Resources ETF (ASR)	0.54%	
Smart Australian ESG ETF (AUE)	0.50%	
Property		
Smart NZ Property ETF (NPF)	0.54%	
Smart Australian Property ETF (ASP)	0.54%	
Bonds		
Smart NZ Bond ETF (NZB)	0.54%	
See the Core Series and Global Series product disclosure statements for information about the 30 other funds in the Scheme, which are available at smartinvest.co.nz .		

The fund charges set out on page 12 are deducted from, and reflected in the value of, the fund. The fund charges cover our manager's fee and other management and administration charges (supervisor, audit and legal costs).

The establishment fee is deducted from the initial contribution amount. We do not charge any other fees on an individual basis for investor-specific decisions or actions.

We may, in exceptional circumstances (for example, a meeting of fund investors is called), deduct costs that relate to the Scheme that arise outside the ordinary course of business from a fund (such occasions are likely to be very rare).

We retain any interest earned on: (a) the cash temporarily held by the funds between the date the cash is received by the funds and the date it is distributed; and (b) contributions between the date contributions are received by us and the date they are used to issue investors with units in the funds.

The revenue earned from securities lending is shared equally, with 50% being paid to the fund the financial products were lent from, and 50% being paid to us (for administering the lending programme).

The fees set out on page 12 include GST where applicable.

Example of how fees apply to an investor

Tara invests \$10,000 in the Smart NZ Mid Cap ETF. She is charged an establishment fee of \$30 (this fee does not apply if Tara buys units in the fund through an NZX Participant or financial advice provider).

This brings the starting value of her investment to \$9,970.

She is also charged fund charges, which work out to about \$59.82 (0.60% of \$9,970). These fees might be more or less if her account balance has increased or decreased over the year.

Estimated total fees for the first year

Individual action fees: \$30

Fund charges: \$59.82

See the latest fund update for the Smart NZ Mid Cap ETF for an example of the actual returns and fees investors were charged over the past year.

This example applies only to the Smart NZ Mid Cap ETF. If you are considering investing in other funds in the Scheme, this example may not be representative of the actual fees you may be charged.

The fees can be changed

We can agree to reduce fees for some groups of investors.

We may change the fees payable by an investor at any time. Where we materially increase a fee, we will give you at least three months' notice of the change.

We must publish a fund update for each fund showing the fees actually charged during the most recent year. Fund updates, including past updates, are available at smartinvest.co.nz.

6. What taxes will you pay?

Each fund is a listed PIE. The amount of tax that each fund pays is calculated at the rate of 28%. However, for New Zealand tax purposes, certain tax concessions apply to distributions made by listed PIEs. For New Zealand tax residents, these concessions mean that if you are currently paying tax at a rate less than 28%, the excess tax paid

by a fund may be able to be used to reduce the tax payable on the other income that you derive at the end of each income year. You can do this by including the fully imputed portion of any distributions (including any bonus issues) from the fund in your tax return.

7. Who is involved?

About the manager

Smartshares Limited (**Smart**) is a fund manager. It is a wholly owned subsidiary of NZX Limited.

Our contact details are:

Smartshares Limited
PO Box 105262
Auckland 1143

Phone: 0800 808 780

Email: contactus@smartinvest.co.nz

Who else is involved?

	Name	Role
Supervisor	Public Trust	Supervises how we manage the Scheme for the benefit of you and other investors.
Custodian	BNP Paribas Fund Services Australasia Pty Ltd	Holds the assets of the Scheme on behalf of you and other investors entirely separate from both its assets and other schemes' assets.
Administration manager	BNP Paribas Fund Services Australasia Pty Ltd	Provides asset valuation, unit pricing and fund accounting services.
Registrar	MUFG Pension and Market Services (NZ) Limited	Provides registry services.

8. How to complain

Manager

Complaints about your investment or the Scheme can be made to us at:

Complaints
Smartshares Limited
PO Box 105262
Auckland 1143

Phone: 0800 808 780

Email: complaints@smartinvest.co.nz

Supervisor

If you make a complaint to us, and the complaint cannot be resolved, you may refer it to the supervisor at:

Complaints
Public Trust
Private Bag 5902
Wellington 6140

Phone: 0800 371 471

Email: cts.enquiry@publictrust.co.nz

Independent dispute resolution scheme

If you make a complaint to us (or the supervisor), and the complaint cannot be resolved, you may refer it to Financial Services Complaints Ltd (**FSCL**) - A Financial Ombudsman Service. FSCL is our independent external ombudsman and dispute resolution service.

Financial Services Complaints Limited
PO Box 5967
Wellington 6140

Phone: 0800 347 257

Email: complaints@fscl.org.nz

FSCL will not charge you a fee to investigate or resolve a complaint.

9. Where you can find more information

Further information relating to the Scheme and funds, including financial statements, annual reports, fund updates and the SIPO, is available on the offer register and the scheme register at disclose-register.companiesoffice.govt.nz.

A copy of the information on the offer register or scheme register is available on request to the Registrar of Financial Service Providers.

The information set out above is available at

smartinvest.co.nz or by contacting us. You can obtain details of your investment at smartinvest.co.nz or by contacting us. This information is available free of charge. See section 7 for our contact details.

You can obtain general information about the Scheme and funds at smartinvest.co.nz.

10. How to apply

To invest in the Scheme, you can buy units in the funds through an NZX Participant (such as a broker). Go to nzx.com/investing/find-a-participant for a list of NZX Participants.

You can also invest in the Scheme by applying at smartinvest.co.nz.

You can also ask your financial adviser about the funds, as many financial advisers have arrangements for investing in the funds through us or buying units in the funds through an NZX Participant.

Smart Exchange Traded Funds Core Series

Product Disclosure Statement

Offer of units in the Smart Exchange Traded Funds.

This document gives you important information about this investment to help you decide whether you want to invest. There is other useful information about this offer on disclose-register.companiesoffice.govt.nz. Smartshares Limited has prepared this document in accordance with the Financial Markets Conduct Act 2013. You can also seek advice from a financial advice provider to help you to make an investment decision.

This is a replacement product disclosure statement. It replaces the Product Disclosure Statement - Core Series dated 22 September 2025.

 **Issued by Smartshares Limited.**
23 September 2025

1. Key information summary

This Product Disclosure Statement - Core Series covers ten of the funds in the Smart Exchange Traded Funds (**Scheme**).

The other 34 funds in the Scheme are covered by the Australasia Series and Global Series product disclosure statements, which are available at smartinvest.co.nz.

What is this?

This is a managed investment scheme. Your money will be pooled with other investors' money and invested in various investments. Smartshares Limited (**Smart, we, our or us**) will invest your money and charge you a fee for our services. The returns you receive are dependent on the investment decisions of Smart and the performance of the investments. The value of those investments may go up or down. The types of investments and the fees you will be charged are described in this product disclosure statement.

What will your money be invested in?

The Scheme has 44 exchange traded funds (each listed on the NZX Main Board). This product disclosure statement covers ten of those funds, each of which are summarised on page 3. More information about the investment target and strategy for each of these funds is provided in section 3.

Who manages the Scheme?

Smart is the manager of the Scheme. See section 7 for more information.

What are the returns?

You may choose to have distributions paid to you. See section 3 for when a fund pays distributions (we may change when distributions are paid at any time following consultation with the supervisor).

How can you get your money out?

Units in the funds are quoted on the NZX Main Board, so you can sell your investment if there are interested buyers. The amount you get may be less than the amount that you invested.

Investments in the Scheme are generally not redeemable for cash. See section 2 for more information.

How will your investment be taxed?

Each fund is a listed portfolio investment entity (**PIE**).

As a listed PIE, each fund will pay tax on taxable income at the rate of 28%. See section 6 for more information.

Where can you find more key information?

We are required to publish quarterly updates for each fund. The updates show the returns, and the total fees actually charged to investors, during the previous year. The latest fund updates are available at smartinvest.co.nz. We will also give you copies of fund updates on request.

Funds summarised in this product disclosure statement

Each fund aims to provide a return to investors that matches the investment objective for the fund, before taking into account tax, fees and other expenses.

Fund	Description and investment objective	Risk indicator	Fund charges (% per annum of the fund's net asset value)
Smart S&P/NZX 50 ETF (NZG)	Invests in New Zealand shares and is designed to track the return of the S&P/NZX 50 Gross with Imputation Index.	Lower risk 1 2 3 4 5 6 7 Higher risk* Potentially lower returnPotentially higher return	0.20%
Smart Australian Top 200 ETF (AUS)	Invests in Australian shares and is designed to track the return of the S&P/ASX 200 Total Return Index.	Lower risk 1 2 3 4 5 6 7 Higher risk* Potentially lower returnPotentially higher return	0.30%
Smart US 500 ETF (USF)	Invests in US shares and is designed to track the return of the S&P 500 Index.	Lower risk 1 2 3 4 5 6 7 Higher risk* Potentially lower returnPotentially higher return	0.34%
Smart US 500 (NZD Hedged) ETF (USH)	Invests in US shares and is designed to track the return of the S&P 500 Dynamic Hedged NZD Index.	Lower risk 1 2 3 4 5 6 7 Higher risk* Potentially lower returnPotentially higher return	0.38%
Smart Total World ETF (TWF)	Invests in international shares and is designed to track the return of the FTSE Global All Cap Index.	Lower risk 1 2 3 4 5 6 7 Higher risk* Potentially lower returnPotentially higher return	0.40%
Smart Total World (NZD Hedged) ETF (TWH)	Invests in international shares and is designed to track the return of the FTSE Global All Cap Index (100% NZD Hedged).	Lower risk 1 2 3 4 5 6 7 Higher risk* Potentially lower returnPotentially higher return	0.46%
Smart S&P/NZX NZ Government Bond ETF (NGB)	Invests in New Zealand bonds and is designed to track the return of the S&P/NZX NZ Government Bond Total Return Index.	Lower risk 1 2 3 4 5 6 7 Higher risk* Potentially lower returnPotentially higher return	0.20%
Smart Global Government Bond ETF (GGB)	Invests in international bonds and is designed to provide returns consistent with the Bloomberg Global Aggregate Treasuries Total Return Index (100% NZD Hedged). The investment manager is BlackRock Investment Management (Australia) Limited.**	Lower risk 1 2 3 4 5 6 7 Higher risk* Potentially lower returnPotentially higher return	0.30%
Smart Global Aggregate Bond ETF (AGG)	Invests in international bonds and is designed to track the return of the Bloomberg Global Aggregate Bond Total Return Index Hedged NZD.	Lower risk 1 2 3 4 5 6 7 Higher risk* Potentially lower returnPotentially higher return	0.30%
Smart NZ Cash ETF (NZC)	Invests in New Zealand cash, with the objective of outperforming the S&P/NZX Bank Bills 90-Day Total Return Index over rolling 1-year periods.	Lower risk 1 2 3 4 5 6 7 Higher risk* Potentially lower returnPotentially higher return	0.20%

See the Australasia Series and Global Series product disclosure statements for more information about the 34 other funds in the Scheme, which are available at smartinvest.co.nz.

*The risk indicators are based on returns data for the 5 years to 30 June 2025. Some of these funds have not been in existence for 5 years, so a combination of actual returns and market index returns have been used to complete the risk indicators. As a result, the risk indicators may provide a less reliable indicator of the potential future volatility of these funds. The risk indicators for the Smart S&P/NZX 50 ETF, Smart Australian Top 200 ETF, Smart US 500 (NZD Hedged) ETF and Smart S&P/NZX NZ Government Bond ETF use 2 months of market index returns. The risk indicators for the Smart US 500 (NZD Hedged) ETF and Smart Global Government Bond ETF use 3 years of market index returns.

**On 3 October 2025 BlackRock Investment Management (Australia) Limited will cease to be the investment manager of the Smart Global Government Bond ETF.

The Scheme has an establishment fee of \$30. This one-off fee applies when you first invest in the Scheme. It does not apply to further investments in the Scheme (including when you invest in additional funds in the Scheme) or if you buy units in a fund through an NZX Participant (such as a broker) or financial advice provider (although the NZX Participant or financial advice provider may charge you a fee for its services).

See section 4 for an explanation of the risk indicator and for information about other risks that are not included in the risk indicator. To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at sorted.org.nz/tools/investor-profiler.

2. How does this investment work?

The key benefits of the Scheme are:

- **Diversification:** With one simple purchase you get an investment in a range of securities, such as listed companies or government bonds, spreading your risk more broadly.
- **Low fees:** The funds keep costs down because for funds that track indices we do not need to make active investment decisions, which may require spending on research and analytical expertise.
- **Flexibility:** Units trade like individual shares. From as little as \$500 up front and \$50 per month, a regular savings plan is a simple and affordable way to accumulate units. See 'Making Investments' on page 7 for more information on how to invest in the Scheme.
- **Convenience:** The funds enable you to build a global portfolio in New Zealand dollars, without having to worry about the complexity of managing foreign currencies or overseas tax. Any distributions are paid in New Zealand dollars and automatically reinvested for you, unless you choose to receive them in cash.

The Scheme is a managed investment scheme under the Financial Markets Conduct Act 2013. To protect the interests of investors, the Scheme's investments are held by an independent custodian, BNP Paribas Fund Services Australasia Pty Ltd, and our operations are supervised by an independent supervisor, Public Trust. The Scheme is governed by a master trust deed between the supervisor and us, and each fund is established as a separate trust.

Your money is pooled and invested with other investors' money.

Every time you pay money into the Scheme you will receive units in the funds you invest in. The number of units that you hold in a fund represents your proportionate interest in that fund. All units in a fund have equal value.

Units only give a beneficial interest in fund assets and do not give you any right to any particular asset of a fund.

All funds have assets (the investments of the fund) and liabilities (the taxes, fees and costs payable by the fund). All liabilities incurred in respect of a fund will be met from the assets of that fund. If the investments in a fund are not sufficient to meet its liabilities, the investments in another fund cannot be used to meet those liabilities.

You may choose to have distributions paid to you. See section 3 for when a fund pays distributions (we may change when distributions are paid at any time following consultation with the supervisor).

The Scheme may undertake securities lending (which generates additional revenue for the benefit of investors and us).

Making investments

To invest in the Scheme, you can buy units in the funds through an NZX Participant (such as a broker) or financial advice provider. Go to nzx.com/investing/find-a-participant for a list of NZX Participants.

You can also invest in the Scheme by applying at smartinvest.co.nz. The minimum initial contribution amount is \$500. After that, you can make further investments through:

- a cash application for further units (the minimum contribution amount is \$250);
- a regular savings plan (the minimum contribution amount is \$50 per month); and/or
- the reinvestment of distributions.

Contributions will be direct debited from your bank account on or about the 20th day of the month and units will be allocated to you on or about the 3rd business day of the following month. You will receive a statement setting out details of your updated investments (you can also view this information at smartinvest.co.nz).

Institutional investors are permitted to make basket contributions (or in the case of the Smart Global Government Bond ETF and Smart NZ Cash ETF, institutional investor contributions). For more information, please see the 'Other Material Information' document on the offer register at disclose-register.companiesoffice.govt.nz.

Withdrawing your investments

Units in the funds are quoted on the NZX Main Board, so you can sell your investment through an NZX Participant (such as a broker) or financial advice provider if there are interested buyers.

Investments in the Scheme are generally not redeemable for cash.

Institutional investors are permitted to make basket withdrawals (or in the case of the Smart Global Government Bond ETF and Smart NZ Cash ETF, institutional investor withdrawals). For more information, please see the 'Other Material Information' document on the offer register at disclose-register.companiesoffice.govt.nz.

How to switch between funds

You can invest in more than one fund at a time. However, you cannot switch from one fund to another fund. If you want to switch funds, you must first sell your existing investment in a fund and then buy an investment in another fund.

3. Description of your investment options

Each fund aims to provide a return to investors that matches the investment objective for the fund, before taking into account tax, fees and other expenses.

Description, investment objective and target investment mix	Risk indicator	Minimum suggested investment timeframe	Distributions
Smart S&P/NZX 50 ETF (NZG) Invests in New Zealand shares and is designed to track the return of the S&P/NZX 50 Gross with Imputation Index. 100% Australasian equities	Lower risk 1 2 3 4 5 6 7 Potentially lower return Potentially higher return*	5 - 10 years	June and December
Smart Australian Top 200 ETF (AUS) Invests in Australian shares and is designed to track the return of the S&P/ASX 200 Total Return Index. 100% Australasian equities	Lower risk 1 2 3 4 5 6 7 Potentially lower return Potentially higher return*	5 - 10 years	June and December
Smart US 500 ETF (USF) Invests in US shares and is designed to track the return of the S&P 500 Index. 100% International equities	Lower risk 1 2 3 4 5 6 7 Potentially lower return Potentially higher return*	5 - 10 years	June and December
Smart US 500 (NZD Hedged) ETF (USH) Invests in US shares and is designed to track the return of the S&P 500 Dynamic Hedged NZD Index. 100% International equities	Lower risk 1 2 3 4 5 6 7 Potentially lower return Potentially higher return*	5 - 10 years	June and December
Smart Total World ETF (TWF) Invests in international shares and is designed to track the return of the FTSE Global All Cap Index. 100% International equities	Lower risk 1 2 3 4 5 6 7 Potentially lower return Potentially higher return*	5 - 10 years	June and December
Smart Total World (NZD Hedged) ETF (TWH) Invests in international shares and is designed to track the return of the FTSE Global All Cap Index (100% NZD Hedged). 100% International equities	Lower risk 1 2 3 4 5 6 7 Potentially lower return Potentially higher return*	5 - 10 years	June and December
Smart S&P/NZX NZ Government Bond ETF (NGB) Invests in New Zealand bonds and is designed to track the return of the S&P/NZX NZ Government Bond Total Return Index. 100% New Zealand fixed interest	Lower risk 1 2 3 4 5 6 7 Potentially lower return Potentially higher return*	2 - 4 years	March, June, September and December

Description, investment objective and target investment mix	Risk indicator	Minimum suggested investment timeframe	Distributions
Smart Global Government Bond ETF (GGB) Invests in international bonds and is designed to provide returns consistent with the Bloomberg Global Aggregate Treasuries Total Return Index (100% NZD Hedged). The investment manager is BlackRock Investment Management (Australia) Limited.** 100% International fixed interest		2 - 4 years	March, June, September and December
Smart Global Aggregate Bond ETF (AGG) Invests in international bonds and is designed to track the return of the Bloomberg Global Aggregate Total Return Index Hedged NZD. 100% International fixed interest		2 - 4 years	March, June, September and December
Smart NZ Cash ETF (NZC) Invests in New Zealand cash, with the objective of outperforming the S&P/NZX Bank Bills 90-Day Total Return Index over rolling 1-year periods. 100% Cash and cash equivalents		Less than 1 year	March, June, September and December
See the Australasia Series and Global Series product disclosure statements for more information about the 34 other funds in the Scheme, which are available at smartinvest.co.nz .			

*The risk indicators are based on returns data for the 5 years to 30 June 2025. Some of these funds have not been in existence for 5 years, so a combination of actual returns and market index returns have been used to complete the risk indicators. As a result, the risk indicators may provide a less reliable indicator of the potential future volatility of these funds. The risk indicators for the Smart S&P/NZX 50 ETF, Smart Australian Top 200 ETF, Smart Total World (NZD Hedged) ETF and Smart S&P/NZX NZ Government Bond ETF use 2 months of market index returns. The risk indicators for the Smart US 500 (NZD Hedged) ETF and Smart Global Government Bond ETF use 3 years of market index returns.

** On 3 October 2025 BlackRock Investment Management (Australia) Limited will cease to be the investment manager of the Smart Global Government Bond ETF.

See the 'Other Material Information' document on the offer register at disclose-register.companiesoffice.govt.nz for more information about the indices referred to on pages 8 to 9.

The Statement of Investment Policy and Objectives (SIPO) for the Scheme sets out the investment policies and objectives for the Scheme. We may change the SIPO at any time following consultation with the supervisor. We will give you at least 30 days' notice of any change that is expected to have a material effect on you.

The SIPO is available at smartinvest.co.nz.

Material changes to the SIPO will be described in the Scheme's annual report.

Further information about the assets in each fund can be found in the fund updates at smartinvest.co.nz.

4. What are the risks of investing?

Understanding the risk indicator

Managed funds in New Zealand must have a standard risk indicator. The risk indicator is designed to help investors understand the uncertainties both for loss and growth that may affect their investment. You can compare funds using the risk indicator.

See section 3 for the risk indicators which have been calculated for each of the funds.

The risk indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the fund's assets goes up and down (volatility). A higher risk generally means higher potential returns over time, but more ups and downs along the way.

To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at sorted.org.nz/tools/investor-profiler.

Note that even the lowest category does not mean a risk-free investment, and there are other risks (described under the heading 'Other specific risks') that are not captured by this rating.

This risk indicator is not a guarantee of a fund's future performance. The risk indicator is based on the returns data for 5 years to 30 June 2025. While risk indicators are usually relatively stable, they do shift from time to time. You can see the most recent risk indicator in the latest fund update for each of the funds.

General investment risks

Some of the things that may cause a fund's value to move up and down, which affect the risk indicator, are:

- **Market risk:** The risk that a market or a sector of a market that a fund invests in declines.
- **Individual financial product risk:** The risk that changes in the financial condition or credit rating of an issuer of a financial product causes the value of a financial product held by a fund to decline.

- **Liquidity risk:** The risk that an investment is difficult to buy or sell and a fund suffers a loss as a result.
- **Currency risk:** The risk that changes in exchange rates cause the value of an international investment to reduce.
- **Credit risk:** The risk that issuers of fixed interest or cash investments do not pay interest and/or capital repayments when these are due.
- **Interest rate risk:** The risk that interest rates rise and the value of investments (in particular, fixed interest and cash investments) may reduce.

Other specific risks

There are other risks that may affect returns for investors, which are not reflected in the risk indicator.

These risks include:

- **Fund tracking risk:** The funds covered by this product disclosure statement (other than the Smart NZ Cash ETF and Smart Global Government Bond ETF) are designed to track specific indices. There is a risk that a fund that is designed to track the return of an index achieves a lower return than the index itself. Tracking difference may occur when the weighting of each of the financial products in an index changes, and the fund that tracks the index is not able to exactly match that change.
- **Securities lending risk:** The Smart S&P/NZX 50 ETF, Smart Australian Top 200 ETF and Smart US 500 (NZD Hedged) ETF have the ability to implement securities lending. There is a risk that a borrower of securities may become insolvent or otherwise unable to meet its obligations to return the borrowed securities to the Scheme.

See the 'Other Material Information' document on the offer register at disclose-register.companiesoffice.govt.nz for further information about the risks of investing in the Scheme.

5. What are the fees?

You will be charged fees for investing in the Scheme. Fees are deducted from your investment and will reduce your returns. If we invest in other funds, those funds may also charge fees (these fees are included in the fund charges below). The fees you pay will be charged in two ways:

- regular charges (for example, fund charges). Small differences in these fees can have a big impact on your investment over the long term; and
- one-off fees (for example, establishment fees).

These are as follows:

Fund	Fund charges (% per annum of the fund's net asset value)	Individual action fees
Smart S&P/NZX 50 ETF (NZG)	0.20%	Establishment fee: \$30 This one-off fee applies when you first invest in the Scheme. It does not apply to further investments in the Scheme (including when you invest in additional funds in the Scheme) or if you buy units in a fund through an NZX Participant (such as a broker) or financial advice provider (although the NZX Participant or financial advice provider may charge you a fee for its services).
Smart Australian Top 200 ETF (AUS)	0.30%	
Smart US 500 ETF (USF)	0.34%	
Smart US 500 (NZD Hedged) ETF (USH)	0.38%	
Smart Total World ETF (TWF)	0.40%	
Smart Total World (NZD Hedged) ETF (TWH)	0.46%	
Smart S&P/NZX NZ Government Bond ETF (NGB)	0.20%	
Smart Global Government Bond ETF (GGB)	0.30%	
Smart Global Aggregate Bond ETF (AGG)	0.30%	
Smart NZ Cash ETF (NZC)	0.20%	
See the Australasia Series and Global Series product disclosure statements for information about the 34 other funds in the Scheme, which are available at smartinvest.co.nz .		

The fund charges set out above are deducted from, and reflected in the value of, the fund. The fund charges cover our manager's fee and other management and administration charges (supervisor, audit and legal costs).

The establishment fee is deducted from the initial contribution amount. We do not charge any other fees on an individual basis for investor-specific decisions or actions.

We may, in exceptional circumstances deduct costs that relate to the Scheme that arise outside the ordinary course of business from a fund (such occasions are likely to be very rare).

We retain any interest earned on: (a) the cash

temporarily held by the funds between the date the cash is received by the funds and the date it is distributed; and (b) contributions between the date contributions are received by us and the date they are used to issue investors with units in the funds.

The revenue earned from securities lending is shared equally, with 50% being paid to the fund the financial products were lent from, and 50% being paid to us (for administering the lending programme).

The fees set out on this page include GST where applicable.

Example of how fees apply to an investor

Tara invests \$10,000 in the Smart US 500 ETF. She is charged an establishment fee of \$30 (this fee does not apply if Tara buys units in the fund through an NZX Participant or financial advice provider).

This brings the starting value of her investment to \$9,970.

She is also charged fund charges, which work out to about \$33.90 (0.34% of \$9,970). These fees might be more or less if her account balance has increased or decreased over the year.

Estimated total fees for the first year

Individual action fees: \$30

Fund charges: \$33.90

See the latest fund update for the Smart US 500 ETF for an example of the actual returns and fees investors were charged over the past year.

This example applies only to the Smart US 500 ETF. If you are considering investing in other funds in the Scheme, this example may not be representative of the actual fees you may be charged.

The fees can be changed

We can agree to reduce fees for some groups of investors.

We may change the fees payable by an investor at any time. Where we materially increase a fee, we will give you at least three months' notice of the change.

We must publish a fund update for each fund showing the fees actually charged during the most recent year. Fund updates, including past updates, are available at smartinvest.co.nz.

6. What taxes will you pay?

Each fund is a listed PIE. The amount of tax that each fund pays is calculated at the rate of 28%. However, for New Zealand tax purposes, certain tax concessions apply to distributions made by listed PIEs. For New Zealand tax residents, these concessions mean that if you are currently paying tax at a rate less than 28%, the excess tax paid

by a fund may be able to be used to reduce the tax payable on the other income that you derive at the end of each income year. You can do this by including the fully imputed portion of any distributions (including any bonus issues) from the fund in your tax return.

7. Who is involved?

About the manager

Smartshares Limited (**Smart**) is a fund manager. It is a wholly owned subsidiary of NZX Limited.

Our contact details are:

Smartshares Limited
PO Box 105262
Auckland 1143

Phone: 0800 808 780

Email: contactus@smartinvest.co.nz

Who else is involved?

	Name	Role
Supervisor	Public Trust	Supervises how we manage the Scheme for the benefit of you and other investors.
Custodian	BNP Paribas Fund Services Australasia Pty Ltd	Holds the assets of the Scheme on behalf of you and other investors entirely separate from both its assets and other schemes' assets.
Administration manager	BNP Paribas Fund Services Australasia Pty Ltd	Provides asset valuation, unit pricing and fund accounting services.
Investment manager	BlackRock Investment Management (Australia) Limited*	Provides investment management services for the Smart Global Government Bond ETF.
Registrar	MUFG Pension and Market Services (NZ) Limited	Provides registry services.

*On 3 October 2025 BlackRock Investment Management (Australia) Limited will cease to be the investment manager of the Smart Global Government Bond ETF.

8. How to complain

Manager

Complaints about your investment or the Scheme can be made to us at:

Complaints
Smartshares Limited
PO Box 105262
Auckland 1143

Phone: 0800 808 780

Email: complaints@smartinvest.co.nz

Supervisor

If you make a complaint to us, and the complaint cannot be resolved, you may refer it to the supervisor at:

Complaints
Public Trust
Private Bag 5902
Wellington 6140

Phone: 0800 371 471

Email: cts.enquiry@publictrust.co.nz

Independent dispute resolution scheme

If you make a complaint to us (or the supervisor), and the complaint cannot be resolved, you may refer it to Financial Services Complaints Ltd (**FSCL**) - A Financial Ombudsman Service. FSCL is our independent external ombudsman and dispute resolution service.

Financial Services Complaints Limited
PO Box 5967
Wellington 6140

Phone: 0800 347 257

Email: complaints@fscl.org.nz

FSCL will not charge you a fee to investigate or resolve a complaint.

9. Where you can find more information

Further information relating to the Scheme and funds, including financial statements, annual reports, fund updates and the SIPO, is available on the offer register and the scheme register at disclose-register.companiesoffice.govt.nz.

A copy of the information on the offer register or scheme register is available on request to the Registrar of Financial Service Providers.

The information set out above is available at smartinvest.co.nz or by contacting us. You can obtain details of your investment at smartinvest.co.nz or by contacting us. This information is available free of charge. See section 7 for our contact details.

You can obtain general information about the Scheme and funds at smartinvest.co.nz.

10. How to apply

To invest in the Scheme, you can buy units in the funds through an NZX Participant (such as a broker). Go to nzx.com/investing/find-a-participant for a list of NZX Participants.

You can also invest in the Scheme by applying at smartinvest.co.nz.

You can also ask your financial adviser about the funds, as many financial advisers have arrangements for investing in the funds through us or buying units in the funds through an NZX Participant.

Smart Exchange Traded Funds Global Series

Product Disclosure Statement

Offer of units in the Smart Exchange Traded Funds.

This document gives you important information about this investment to help you decide whether you want to invest. There is other useful information about this offer on disclose-register.companiesoffice.govt.nz. Smartshares Limited has prepared this document in accordance with the Financial Markets Conduct Act 2013. You can also seek advice from a financial advice provider to help you to make an investment decision.

This is a replacement product disclosure statement. It replaces the Product Disclosure Statement - Global Series dated 22 September 2025.

 **Issued by Smartshares Limited.**
12 May 2026

1. Key information summary

This Product Disclosure Statement - Global Series covers 20 of the funds in the Smart Exchange Traded Funds (**Scheme**).

The other 24 funds in the Scheme are covered by the Core Series and Australasia Series product disclosure statements, which are available at martinvest.co.nz.

What is this?

This is a managed investment scheme. Your money will be pooled with other investors' money and invested in various investments. Smartshares Limited (**Smart, we, our or us**) will invest your money and charge you a fee for our services. The returns you receive are dependent on the investment decisions of Smart and the performance of the investments. The value of those investments may go up or down. The types of investments and the fees you will be charged are described in this product disclosure statement.

What will your money be invested in?

The Scheme has 44 exchange traded funds (each listed on the NZX Main Board). This product disclosure statement covers 20 of those funds, each of which are summarised on pages 3 to 4. More information about the investment target and strategy for each of these funds is provided in section 3.

Who manages the Scheme?

Smart is the manager of the Scheme. See section 7 for more information.

What are the returns?

For some funds, you may choose to have distributions paid to you. See section 3 for whether a fund pays distributions and when (we may change when distributions are paid at any time following consultation with the supervisor).

How can you get your money out?

Units in the funds are quoted on the NZX Main Board, so you can sell your investment if there are interested buyers. The amount you get may be less than the amount that you invested.

Investments in the Scheme are generally not redeemable for cash. See section 2 for more information.

How will your investment be taxed?

Each fund is a listed portfolio investment entity (**PIE**).

As a listed PIE, each fund will pay tax on taxable income at the rate of 28%. See section 6 for more information.

Where can you find more key information?

We are required to publish quarterly updates for each fund. The updates show the returns, and the total fees actually charged to investors, during the previous year. The latest fund updates are available at martinvest.co.nz. We will also give you copies of fund updates on request.

Funds summarised in this product disclosure statement

Each fund aims to provide a return to investors that matches the investment objective for the fund, before taking into account tax, fees and other expenses.

Fund	Description and investment objective	Risk indicator	Fund charges (% per annum of the fund's net asset value)
US shares			
Smart US Large Growth ETF (USG)	Invests in US shares and is designed to track the return of the CRSP US Large Cap Growth Index.	Lower risk 1 2 3 4 5 6 7 Potentially lower return Potentially higher return	0.51%
Smart US Large Value ETF (USV)	Invests in US shares and is designed to track the return of the CRSP US Large Cap Value Index.	Lower risk 1 2 3 4 5 6 7 Potentially lower return Potentially higher return	0.51%

See the Core Series and Australasia Series product disclosure statements for information about the 24 other funds in the Scheme, which are available at smartinvest.co.nz.

*The risk indicators are based on returns data for the 5 years to 31 March 2026. Some of these funds have not been in existence for 5 years, so a combination of actual returns and market index returns have been used to complete the risk indicators. As a result, the risk indicators may provide a less reliable indicator of the potential future volatility of these funds. The risk indicators for the Smart Global Infrastructure ETF and Smart Global Property ETF use 2 years and 3 months of market index returns. The risk indicator for the Smart US Technology (NZD Hedged) ETF uses 3 years and 6 months of market index returns. The risk indicators for the Smart Bitcoin ETF and Smart Gold ETF use 3 years and 6 months of index returns.

▲ The Smart Bitcoin ETF is subject to extreme price volatility. The actual risk associated with this fund may be substantially higher than indicated by the risk category of 7. For more information, please refer to section 4.

The Scheme has an establishment fee of \$30. This one-off fee applies when you first invest in the Scheme. It does not apply to further investments in the Scheme (including when you invest in additional funds in the Scheme) or if you buy units in a fund through an NZX Participant (such as a broker) or financial advice provider (although the NZX Participant or financial advice provider may charge you a fee for its services).

See section 4 for an explanation of the risk indicator and for information about other risks that are not included in the risk indicator. To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at sorted.org.nz/tools/investor-profiler.

2. How does this investment work?

The key benefits of the Scheme are:

- **Diversification:** With one simple purchase you get an investment in a range of securities, such as listed companies or government bonds, spreading your risk more broadly.
- **Low fees:** The funds keep costs down because for funds that track indices we do not need to make active investment decisions, which may require spending on research and analytical expertise.
- **Flexibility:** Units trade like individual shares. From as little as \$500 up front and \$50 per month, a regular savings plan is a simple and affordable way to accumulate units. See 'Making Investments' on page 7 for more information on how to invest in the Scheme.
- **Convenience:** The funds enable you to build a global portfolio in New Zealand dollars, without having to worry about the complexity of managing foreign currencies or overseas tax. Any distributions are paid in New Zealand dollars and automatically reinvested for you, unless you choose to receive them in cash.

The Scheme is a managed investment scheme under the Financial Markets Conduct Act 2013. To protect the interests of investors, the Scheme's investments are held by an independent custodian, BNP Paribas Fund Services Australasia Pty Ltd, and our operations are supervised by an independent supervisor, Public Trust. The Scheme is governed by a master trust deed between the supervisor and us, and each fund is established as a separate trust.

Your money is pooled and invested with other investors' money.

Every time you pay money into the Scheme you will receive units in the funds you invest in. The number of units that you hold in a fund represents your proportionate interest in that fund. All units in a fund have equal value.

Units only give a beneficial interest in fund assets and do not give you any right to any particular asset of a fund.

All funds have assets (the investments of the fund) and liabilities (the taxes, fees and costs payable by the fund). All liabilities incurred in respect of a fund will be met from the assets of that fund. If the investments in a fund are not sufficient to meet its liabilities, the investments in another fund cannot be used to meet those liabilities.

For some funds, you may choose to have distributions paid to you. See section 3 for whether a fund pays distributions and when (we may change when distributions are paid at any time following consultation with the supervisor).

The Scheme may undertake securities lending (which generates additional revenue for the benefit of investors and us).

Making investments

To invest in the Scheme, you can buy units in the funds through an NZX Participant (such as a broker) or financial advice provider. Go to nzx.com/investing/find-a-participant for a list of NZX Participants.

You can also invest in the Scheme by applying at smartinvest.co.nz. The minimum initial contribution amount is \$500. After that, you can make further investments through:

- a cash application for further units (the minimum contribution amount is \$250);
- a regular savings plan (the minimum contribution amount is \$50 per month); and/or
- the reinvestment of distributions.

Contributions will be direct debited from your bank account on or about the 20th day of the month and units will be allocated to you on or about the 3rd business day of the following month. You will receive a statement setting out details of your updated investments (you can also view this information at smartinvest.co.nz).

Institutional investors are permitted to make basket contributions (or in the case of the Smart Global Bond ETF, institutional investor contributions). For more information, please see the 'Other Material Information' document on the offer register at disclose-register.companiesoffice.govt.nz.

Withdrawing your investments

Units in the funds are quoted on the NZX Main Board, so you can sell your investment through an NZX Participant (such as a broker) or financial advice provider if there are interested buyers.

Investments in the Scheme are generally not redeemable for cash.

Institutional investors are permitted to make basket withdrawals (or in the case of the Smart Global Bond ETF, institutional investor withdrawals). For more information, please see the 'Other Material Information' document on the offer register at disclose-register.companiesoffice.govt.nz.

How to switch between funds

You can invest in more than one fund at a time. However, you cannot switch from one fund to another fund. If you want to switch funds, you must first sell your existing investment in a fund and then buy an investment in another fund.

3. Description of your investment options

Each fund aims to provide a return to investors that matches the investment objective for the fund, before taking into account tax, fees and other expenses.

Description, investment objective and target investment mix	Risk indicator	Minimum suggested investment timeframe	Distributions
US shares			
Smart US Large Growth ETF (USG) Invests in US shares and is designed to track the return of the CRSP US Large Cap Growth Index.	Lower risk 1 2 3 4 5 6 7 Potentially lower return Potentially higher return	5 - 10 years	June and December

See the Core Series and Australasia Series product disclosure statements for information about the 24 other funds in the Scheme, which are available at smartinvest.co.nz .			

*The risk indicators are based on returns data for the 5 years to 31 March 2026. Some of these funds have not been in existence for 5 years, so a combination of actual returns and market index returns have been used to complete the risk indicators. As a result, the risk indicators may provide a less reliable indicator of the potential future volatility of these funds. The risk indicators for the Smart Global Infrastructure ETF and Smart Global Property ETF use 2 years and 3 months of market index returns. The risk indicator for the Smart US Technology (NZD Hedged) ETF uses 3 years and 6 months of market index returns. The risk indicators for the Smart Bitcoin ETF and Smart Gold ETF use 3 years and 6 months of index returns.

⚠ The Smart Bitcoin ETF is subject to extreme price volatility. The actual risk associated with this fund may be substantially higher than indicated by the risk category of 7. For more information, please refer to section 4.

See the ‘Other Material Information’ document on the offer register at disclose-register.companiesoffice.govt.nz for more information about the indices referred to on pages 8 to 11.

The Statement of Investment Policy and Objectives (**SIPO**) for the Scheme sets out the investment policies and objectives for the Scheme. We may change the SIPO at any time following consultation with the supervisor.

We will give you at least 30 days’ notice of any change that is expected to have a material effect

on you.

The SIPO is available at smartinvest.co.nz. Material changes to the SIPO will be described in the Scheme’s annual report.

Further information about the assets in each fund can be found in the fund updates at smartinvest.co.nz.

4. What are the risks of investing?

Understanding the risk indicator

Managed funds in New Zealand must have a standard risk indicator. The risk indicator is designed to help investors understand the uncertainties both for loss and growth that may affect their investment. You can compare funds using the risk indicator.

See section 3 for the risk indicators which have been calculated for each of the funds.

The risk indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the fund's assets goes up and down (volatility). A higher risk generally means higher potential returns over time, but more ups and downs along the way.

To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at sorted.org.nz/tools/investor-profiler.

Note that even the lowest category does not mean a risk-free investment, and there are other risks (described under the heading 'Other specific risks') that are not captured by this rating.

This risk indicator is not a guarantee of a fund's future performance. The risk indicator is based on the returns data for 5 years to 31 March 2026. While risk indicators are usually relatively stable, they do shift from time to time. You can see the most recent risk indicator in the latest fund update for each of the funds.

General investment risks

Some of the things that may cause a fund's value to move up and down, which affect the risk indicator, are:

- **Market risk:** The risk that a market or a sector of a market that a fund invests in declines.
- **Individual financial product risk:** The risk that changes in the financial condition or credit rating of an issuer of a financial product causes the value of a financial product held by a fund to decline.
- **Liquidity risk:** The risk that an investment is difficult to buy or sell and a fund suffers a loss as a result.
- **Currency risk:** The risk that changes in exchange rates cause the value of an international investment to reduce.
- **Credit risk:** The risk that issuers of fixed interest or cash investments do not pay interest and/or capital repayments when these are due.
- **Interest rate risk:** The risk that interest rates rise and the value of investments (in particular, fixed interest and cash investments) may reduce.

Other specific risks

There are other risks that may affect returns for investors, which are not reflected in the risk indicator.

These risks include:

- **Fund tracking risk:** The funds covered by this product disclosure statement (other than the Smart Global Bond ETF, Smart Bitcoin ETF and Smart Gold ETF) are designed to track specific indices. There is a risk that a fund that is designed to track the return of an index achieves a lower return than the index itself. Tracking difference may occur when the weighting of each of the financial products in an index changes, and the fund that tracks the index is not able to exactly match that change.
- **Securities lending risk:** Many of the funds covered by this product disclosure statement have the ability to implement securities lending. Please refer to the SIPO for information on each fund. There is a risk that a borrower of securities may become insolvent or otherwise unable to meet its obligations to return the borrowed securities to the Scheme.

- **Bitcoin risk:** The value of the Smart Bitcoin ETF is subject to the value of the underlying bitcoin. Bitcoin is a cryptocurrency and there are significant risks which could result in it losing all or substantially all of its value. These risks include:
 - Cyber security - cyber-attacks, breaches or errors could result in corruption of the blockchain or disruption to the Bitcoin network. Bitcoin is a digital bearer instrument and is exposed to potential loss, theft or compromise of its associated private keys.
 - Market adoption - The value of bitcoin is closely tied to market sentiment and demand may reduce if it does not achieve the expected level of market adoption. The creation and acceptance of other digital assets could also adversely impact the value of bitcoin.

See the 'Other Material Information' document on the offer register at disclose-register.companiesoffice.govt.nz for further information about the risks of investing in the Scheme.

5. What are the fees?

You will be charged fees for investing in the Scheme. Fees are deducted from your investment and will reduce your returns. If we invest in other funds, those funds may also charge fees (these fees are included in the fund charges below). The fees you pay will be charged in two ways:

- regular charges (for example, fund charges). Small differences in these fees can have a big impact on your investment over the long term; and
- one-off fees (for example, establishment fees).

These are as follows:

Fund	Fund charges (% per annum of the fund's net asset value)	Individual action fees
US shares		Establishment fee: \$30
Smart US Large Growth ETF (USG)	0.51%	This one-off fee applies when you first invest in the Scheme. It does not apply to further investments in the Scheme (including when you invest in additional funds in the Scheme) or if you buy units in a fund through an NZX Participant (such as a broker) or financial advice provider (although the NZX Participant or financial advice provider may charge you a fee for its services).
Smart US Large Value ETF (USV)	0.51%	
Smart US Mid Cap ETF (USM)	0.51%	
Smart US Small Cap ETF (USS)	0.51%	
Smart US ESG ETF (USA)	0.34%	
Smart US Technology (NZD Hedged) ETF (UST)	0.45%	
International shares		
Smart Global ESG ETF (ESG)	0.54%	
Smart Asia Pacific ETF (APA)	0.55%	
Smart Japan ESG ETF (JPN)	0.55%	
Smart Emerging Markets ETF (EMF)	0.59%	
Smart Emerging Markets ESG ETF (EMG)	0.59%	
Smart Europe ETF (EUF)	0.55%	
Smart Europe ESG ETF (EUG)	0.55%	
Thematic		
Smart Automation and Robotics ETF (BOT)	0.75%	
Smart Bitcoin ETF (BTC)	0.55%	
Smart Gold ETF (GLD)	0.55%	
Smart Global Infrastructure ETF (INF)	0.60%	
Smart Healthcare Innovation ETF (LIV)	0.75%	
Property		
Smart Global Property ETF (GPR)	0.54%	
Bonds		
Smart Global Bond ETF (GBF)	0.54%	
See the Core Series and Australasia Series product disclosure statements for information about the 24 other funds in the Scheme, which are available at smartinvest.co.nz .		

The fund charges set out on page 14 are deducted from, and reflected in the value of, the fund. The fund charges cover our manager's fee and other management and administration charges (supervisor, audit and legal costs).

The establishment fee is deducted from the initial contribution amount. We do not charge any other fees on an individual basis for investor-specific decisions or actions.

We may, in exceptional circumstances (for example, a meeting of fund investors is called), deduct costs that relate to the Scheme that arise outside the ordinary course of business from a fund (such occasions are likely to be very rare).

We retain any interest earned on: (a) the cash temporarily held by the funds between the date the cash is received by the funds and the date it is distributed; and (b) contributions between the date contributions are received by us and the date they are used to issue investors with units in the funds.

The revenue earned from securities lending is shared equally, with 50% being paid to the fund the financial products were lent from, and 50% being paid to us (for administering the lending programme).

The fees set out on page 14 include GST where applicable.

Example of how fees apply to an investor

Tara invests \$10,000 in the Smart Global Infrastructure ETF. She is charged an establishment fee of \$30 (this fee does not apply if Tara buys units in the fund through an NZX Participant or financial advice provider).

This brings the starting value of her investment to \$9,970.

She is also charged fund charges, which work out to about \$59.82 (0.60% of \$9,970). These fees might be more or less if her account balance has increased or decreased over the year.

Estimated total fees for the first year

Individual action fees: \$30

Fund charges: \$59.82

See the latest fund update for the Smart Global Infrastructure ETF for an example of the actual returns and fees investors were charged over the past year.

This example applies only to the Smart Global Infrastructure ETF. If you are considering investing in other funds in the Scheme, this example may not be representative of the actual fees you may be charged.

The fees can be changed

We can agree to reduce fees for some groups of investors.

We may change the fees payable by an investor at any time. Where we materially increase a fee, we will give you at least three months' notice of the change.

We must publish a fund update for each fund showing the fees actually charged during the most recent year. Fund updates, including past updates, are available at martinvest.co.nz.

6. What taxes will you pay?

Each fund is a listed PIE. The amount of tax that each fund pays is calculated at the rate of 28%. However, for New Zealand tax purposes, certain tax concessions apply to distributions made by listed PIEs. For New Zealand tax residents, these concessions mean that if you are currently paying tax at a rate less than 28%, the excess tax paid

by a fund may be able to be used to reduce the tax payable on the other income that you derive at the end of each income year. You can do this by including the fully imputed portion of any distributions (including any bonus issues) from the fund in your tax return.

7. Who is involved?

About the manager

Smartshares Limited (**Smart**) is a fund manager. It is a wholly owned subsidiary of NZX Limited.

Our contact details are:

Smartshares Limited
PO Box 105262
Auckland 1143
Phone: 0800 808 780
Email: contactus@smartinvest.co.nz

Who else is involved?

	Name	Role
Supervisor	Public Trust	Supervises how we manage the Scheme for the benefit of you and other investors.
Custodian	BNP Paribas Fund Services Australasia Pty Ltd	Holds the assets of the Scheme on behalf of you and other investors entirely separate from both its assets and other schemes' assets.
Administration manager	BNP Paribas Fund Services Australasia Pty Ltd	Provides asset valuation, unit pricing and fund accounting services.
Registrar	MUFG Pension and Market Services (NZ) Limited	Provides registry services.

8. How to complain

Manager

Complaints about your investment or the Scheme can be made to us at:

Complaints
Smartshares Limited
PO Box 105262
Auckland 1143

Phone: 0800 808 780

Email: complaints@smartinvest.co.nz

Supervisor

If you make a complaint to us, and the complaint cannot be resolved, you may refer it to the supervisor at:

Complaints
Public Trust
Private Bag 5902
Wellington 6140

Phone: 0800 371 471

Email: cts.enquiry@publictrust.co.nz

Independent dispute resolution scheme

If you make a complaint to us (or the supervisor), and the complaint cannot be resolved, you may refer it to Financial Services Complaints Ltd (**FSCL**) - A Financial Ombudsman Service. FSCL is our independent external ombudsman and dispute resolution service.

Financial Services Complaints Limited
PO Box 5967
Wellington 6140

Phone: 0800 347 257

Email: complaints@fscl.org.nz

FSCL will not charge you a fee to investigate or resolve a complaint.

9. Where you can find more information

Further information relating to the Scheme and funds, including financial statements, annual reports, fund updates and the SIPO, is available on the offer register and the scheme register at disclose-register.companiesoffice.govt.nz.

A copy of the information on the offer register or scheme register is available on request to the Registrar of Financial Service Providers.

The information set out above is available at smartinvest.co.nz or by contacting us. You can

obtain details of your investment at smartinvest.co.nz or by contacting us. This information is available free of charge. See section 7 for our contact details.

You can obtain general information about the Scheme and funds at smartinvest.co.nz.

10. How to apply

To invest in the Scheme, you can buy units in the funds through an NZX Participant (such as a broker). Go to nzx.com/investing/find-a-participant for a list of NZX Participants.

You can also invest in the Scheme by applying at smartinvest.co.nz.

You can also ask your financial adviser about the funds, as many financial advisers have arrangements for investing in the funds through us or buying units in the funds through an NZX Participant.
